14.0 Consulting for Digital Transformation

Our services

3 14.0 Consulting for Digital Transformation

Our i4.0 digital transformation service designs a personalized agenda to implement i4.0 solutions based on your industry's digital strengths and the projected growth potential we foresee together for your business, leveraging the benefits of technology. This agenda balances your immediate and future needs, enabling you to develop, support, or maintain various digital innovations that could impact multiple business process integrations and software systems at the ERP, MES, SCADA, and LIMS levels, among other digital solutions.

What sets us apart is our ability to adapt to our clients' working systems based on their digital development skills. This involves from negotiating a software as a service business model to accompanying and forming mixed development teams that enhance the digital capabilities of their current IT structures and improve the IT services, they currently receive from third parties.

Backed by a team of specialized experts, we are well-equipped to guide you through an all-encompassing journey towards transforming your industry into a more integrated and intelligent manufacturing model, in line with international best practices.
